mendix
A Siemens Business

Mendix Low-code platform

What is Mendix

Mendix is a **low-code application development platform** that enables businesses to build, integrate, and deploy applications quickly with minimal coding.

Designed for both developers and **business users**, Mendix accelerates digital transformation by enabling rapid, scalable application development.

Flexibility Across User Groups

Apps can be tailored for shop-floor operators, maintenance teams, planners and management. One platform covers multiple use cases.

Digital Transformation and Industry 4.0 Standards

Mendix, part of Siemens, supports Industry 4.0 and Smart Manufacturing strategies. nables companies to digitalize processes and boost efficiency simply.

Why Mendix

Accelerated Application Development and Deployment

Mendix as a low-code platform enables applications to be built 6-10x faster compared to traditional coding. Manufacturers can react more quickly to changing requirements in production, quality, or logistics.

Reduced Costs and Less Dependence on IT Capacity

With low-code, apps can be developed not only by IT teams but also by business developers / power users. This reduces development costs and accelerates delivery of solutions directly where they are needed most.

Integration with Manufacturing Systems and IoT

Mendix provides native connectors for MES, ERP, PLM, IoT platforms and automation systems. This makes it easy to build apps that combine shop-floor, logistics, and maintenance data.

Global Ecosystem and Proven Use Cases in Manufacturing

Mendix is used by leading manufacturers such as Continental, Bosch, ASML and Siemens Energy. There are dozens of proven use cases: predictive maintenance applications, track & trace and digital work instructions.

Right choise for companies that:

need to respond quickly to market and customer changes. Agility is key in manufacturing, and Mendix enables faster adaptation with low-code applications.

have complex processes that require digitalization. Mendix helps streamline and automate workflows, reducing manual effort and errors.

want to integrate different systems (MES, ERP, PLM, IoT). With built-in connectors, Mendix bridges gaps between production, engineering, and business systems.

must address regulations, quality, and efficiency. The platform supports compliance, ensures consistent quality, and optimizes production performance.

Help us better understand your IT needs.
It only takes 3 minutes of your time.
